I tried to respond to this message before but got kicked out of email...

Thanks Greg.

Regarding the decision not to move forward with final listing in March, we received your email request and are in the process of coordinating with our HQ's NPL listing office and others. You should hear back from us soon.

Regarding communications about postponing the listing with the tribes and others, it is important for NDEP, BLM, and EPA to coordinate closely and communicate similar messages. I agree that right now is premature but we should be able soon. We need to develop a communication strategy that includes talking pts before reaching out to the tribes, local Gov, and community members. We can discuss further during our meeting next Monday at 3pm.

Thanks,
Angeles

> Hey guys,
> I would agree that Jeryl only generically informed us that the deferral path is still being pursued, based on the Tuesday meeting. (Jeryl informed me separately about the "covenants" issue.) The tribes knew enough background about what is going on, though, to know the significance of that information. The tribes know that they have not yet been involved in the deferral discussion, and Jeryl did indicate that per the schedule they would be consulted in the May timeframe. I believe that timing upset them and is precipitating the letter.

> I talked with Jeryl and we would not characterize it that way. In response to a question from Dietrick, Jeryl stated that we are continuing to work on a deferral path, not inconsistent with Dave Emme's NPL listing formal comment letter. Jeryl did not review any specific "outcomes" from the meeting or indicate any decisions were made with respect to postponing listing. They did not mention anything about sending a letter. We did receive the attached letter previously and are waiting to respond. I am not sure why they would send an additional letter now. No decisions have been made or communicated.
